Skills

- Java | Spring | Spring Boot | JSP | JPA | MuleSoft | DataWeave | Munit | Salesforce | PHP | Twig | Blade | Laravel | Symfony | C# | .NET |
- JavaScript | NodeJS | ReactJS | HTML | CSS | Thymeleaf | Erlang | Scala | Jasper | Power Automate | Power BI | DAX | SailPoint IdentityIQ |
- Microservices | API-Led Connectivity | OOP | Maven | Git | Snowflake | SQL | NoSQL | Azure Functions & DevOps | CI/CD | Unit Testing |
- **Spanish** | Native | - **English** | B2 - Proficient | - **Portuguese** | A2 - Intermediate

Experience

Sr Software Engineer

Endava

04/2021 - Current

- Led and contributed to all phases of the Software Development Lifecycle (SDLC) for enterprise banking solutions, from requirements gathering to deployment and support.
 - Managed a cross-functional team of MuleSoft and QA engineers; delivered secure, scalable APIs aligned with banking compliance.
 - Built integrations using MuleSoft (DataWeave 2.0), connecting platforms like Salesforce (CDC & Platform Events), Workday, Snowflake, Kafka, Redis, and FTP.
 - Managed ETL workflows and synchronized data across third-party and internal services.
 - Developed full-stack apps using ReactJS, Node.js (Azure Functions), and MongoDB, deployed via Azure DevOps.
 - Developed microservices using Java 8/17 (Spring Boot, JPA) with MSSQL, and integrated ReactJS frontends payments platform.
 - Mentored junior developers, facilitated onboarding, and promoted team collaboration.
 - Resolved complex technical issues, improving uptime and system performance.
 - Created and maintained technical documentation and deployment guides.
 - Conducted code reviews to enforce best practices and ensure code quality.
- contract status accordingly.
- Built a contract automation workflow using Power Automate and Java APIs, generating PDFs, sending emails, and exposing endpoints for accepting/rejecting terms via embedded HTML pages.

Sr Software Engineer

Certicamara

11/2019 - 03/2021

- Delivered biometric authentication services using fingerprint recognition, digital certificates, and tokens, integrating with private and government ID providers.
- Developed and maintained SSL-secured APIs in Java (7, 8, 11) for encrypted communications in compliance with financial security standards.
- Enabled digital signature workflows for secure document and credit application processing.
- Built front-end interfaces with Thymeleaf and JSP, and desktop apps using C# / .NET.
- Implemented biometric validation logic using Scala and stored identity data in MongoDB.
- Collaborated with QA and support teams to troubleshoot issues and improve platform adoption.

Software Development Engineer

Toritech

09/2018 - 10/2019

- Developed and tested backend and frontend components using Java 8 (monolithic apps) and Laravel with Blade for dynamic HTML views.
- Managed deployment processes across various environments, ensuring successful releases and version control.
- Provided technical support and direct communication with customers, addressing integration, performance, and usability concerns.
- Created data-driven reports using Jasper Reports and supported database operations with MongoDB and PostgreSQL.
- Configured and maintained SailPoint IdentityIQ integrations with systems such as AS400, Microsoft Active Directory, and other identity providers, ensuring secure and seamless identity governance.

Software Engineer

Centuritech

01/2017 - 09/2018

- Developed web applications and automation scripts using PHP (Symfony) and Java 7/8, meeting performance and functionality requirements
- Maintained SMS and multimedia messaging services (audio, dedications, jokes) using SMTP protocols and third-party SMS platforms to ensure real-time delivery.
- Diagnosed and resolved technical issues across application layers and third-party services, contributing to system reliability and end-user satisfaction.
- Supported ETL processes using open-source tools to extract data from MSSQL, MySQL, and other sources, and load into PostgreSQL for reporting.
- Designed and maintained Power BI dashboards using DAX, delivering dynamic visual insights for stakeholders.

Education

Bachelor of CUN National Unified Corp *Bogota, Colombia* **01/2010 - 10/2014**

- Major in Systems Computer Engineering

Diploma of CUN National Unified Corp *Bogota, Colombia* **01/2014 - 10/2014**

- E-Business

Courses

- **Anypoint Platform (MAX150)** –_Trailhead – **04/2025**
- **Java 17 Backend Developer** –_Mitocode Network (Peru) – **10/2023**
- **Java SE 17 Developer 1Z0-829 OCP** – Mitocode Network (Peru) – **10/2023**
- **Java Fundamentals** – Oracle – **10/2022**
- **Professional Git & Github** – Platzi – **03/2018**

Strengths

- **Leadership:** Proven ability to lead cross-functional teams and drive product-oriented outcomes.
- **Fast Learner:** Strong initiative to quickly learn new technologies, with a mindset rooted in adaptability and continuous learning.
- **Team Player:** Thrive in collaborative environments; consistently support team members and foster shared success.
- **Problem Solving:** Skilled in diagnosing and resolving software challenges across diverse and complex systems.
- **Initiative & Proactivity:** Proactively take ownership, anticipate issues, and deliver solutions independently.

Hobbies

- **Gaming:** Passionate about video games, strategy games, and exploring game development platforms.
- **Technology & Computers:** Enthusiast of emerging tech, automation tools, and hardware experimentation.
- **Listening to Music:** Find inspiration and relaxation through various genres of music.
- **3D Printing:** Enjoy designing and printing functional or creative objects using consumer-grade 3D printers.
- **Learning Languages:** Continuously learning new languages to expand cultural understanding and communication skills.
- **Artificial Intelligence:** Actively explore machine learning tools, AI frameworks, and their real-world applications.
- **Cycling & Running:** Stay active through outdoor sports and urban mobility.
- **Weightlifting:** Focused on strength training and overall physical wellness.
- **Traveling:** Love discovering new places and cultures to gain global perspectives.
- **Dogs:** A devoted dog lover who enjoys spending time with pets and animals.
